

# Automotive Battery Charger (6V/12V)

**TAGLab**

Model : C4

## Product Description

- **TAGLab Automotive Battery Charger - Model : C4** is designed for charging wide range of automotive lead acid batteries used for Scooters, Bikes, Motorcycles, Passenger Cars and certain other vehicles.
- The C4 charger is equipped with a microprocessor (MCU - Micro Computer Unit) and features fully automatic 9 stages charging and maintenance.
- The model C4 is suitable for 6V / 12V lead acid batteries.
- Rated Output Voltage : **6V / 12V**
- Battery Capacity : **6V : 1.2 ~ 16 Ah / 12V : 5 ~ 130 Ah**
- Charging Voltage : **7.2V / 14.7V**
- Charging Current : **2A / 4A**
- Battery Types : **Lead-acid batteries (VRLA, WET, GEL, EFB, AGM)**

## Features

- Vehicle Compatibility : Two Wheeler and Passenger Cars.
- Applicable for 6-Volt and 12-Volt Car batteries and 2 Wheeler batteries.
- Trickle charging for optimum battery care.
- Dust and splash water proof IP65.
- Power backup and Regeneration functions.
- Product doesn't work on Dead or Defective batteries.
- Product will only charge the Battery.
- Charge holding will solely depend on Battery quality / life.
- Safety Functions : Short Circuit Protection (defective battery), Reverse Charge Protection (connected with reversed polarity), Sparking, Over Heat Protection, Over Current Protection.
- Over Charge Protection to prevent damage to the charger and the battery or the vehicle.
